

Recruit and Track Volunteers Easily with Volunteer Manager

A lot of parents offer to help at the beginning of the year, but their information falls through the cracks and they never get contacted. With Volunteer Manager you'll be able to easily find and match the right volunteers with the right available opportunities in minutes and email them instantly.

6 Time-Saving Features Your Group Will Love

INSTANT ACCESS TO CURRENT INFORMATION

Volunteer Manager puts all of your volunteer information online in a centralized password-protected area allowing you and your group leaders to access and update key information any time, from any place — school, work or home. And, when the new school year starts, all your data from the previous year is already in place and ready for you to update as needed.

VOLUNTEER HOURS CAPTURED

With Volunteer Manager, you'll always have an accurate and ongoing record of all the hours volunteered by parents and group members because the program tracks hours automatically as they are entered. You can either have volunteers enter their own hours or you can have someone on your team enter them.

EASY EMAIL COMMUNICATION WITH PARENTS

Volunteer Manager's built in email system makes it easy to make sure all your school's parents are in the know. Need to send out your newsletter? You can generate an email to everyone at your school and attach your newsletter in a few clicks. We also have a seamless interface between the Parent Express Email system and the Volunteer Manager program, so that Volunteer Manager emails are sent using the powerful email capabilities of Parent Express Email.

VISITOR AND VOLUNTEER SIGN-IN OPTION

The sign-in feature provides your school with a great way to easily track school visitors and their volunteer hours. School visitors simply sign in and out electronically using a designated internet-accessible computer at your school. Volunteer hours/tasks are automatically updated and you (or anyone with the right security level) can get a complete list of who is in the building and their location at any time.

SEAMLESS OFFICER TRANSITION

Newly elected officers get instant access to all your volunteer information so they can hit the ground running. This cuts down significantly on ramp up time and gives new leaders and future leaders a great foundation to build on your group's success.

ONLINE DATA BACKUP

Because Volunteer Manager is web-based; all of your data sits safely and securely on our server where it's backed-up daily. So if your hard drive dies or one of your officer's computers crashes, it doesn't affect your data because the information isn't stored on your machine.

We offer 30 day free trial to get you started. The best part is, whatever you enter during the trial is saved — so no starting over once you purchase the software!
